

AeroCatch®

A comparison of Counterfeit vs. Genuine AeroCatch® follows.

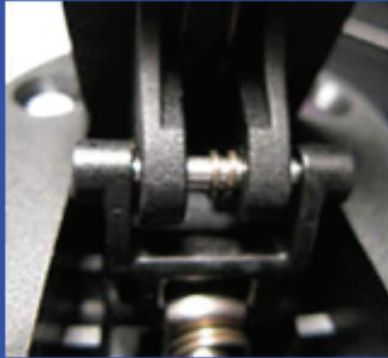

These photos detail the differences between counterfeit and genuine AeroCatch®.

For your own safety, please insist on the original design registered by Specialty Fasteners and Components (SFC).

Counterfeit

Genuine

▶ COUNTERFEIT

Poor quality tooling and material leaves molding marks on both handle and link arm.

▶ GENUINE

All molded components have an engineered finish

▶ COUNTERFEIT

Slide pin and spring manufactured from plated steel.

▶ GENUINE

Slide pin and spring manufactured from stainless steel

▶ COUNTERFEIT

Cross pin pivots are not fixed and could easily move out of position during use with the distinct possibility of failure.

▶ GENUINE

All cross pivot pins are encapsulated.

▶ COUNTERFEIT

Registered design number in different font.

▶ GENUINE

Registered design number set in a box.
